In terms of security service, choosing a partner is a matter of trust. SUMMUM SECURITY offers you the best service. In order to do so, we select our guards in a very strict manner. Of course, they must be trained following regulations, but they must also master different physical disciplines, so that they can master their mind as well as their body.
Every customer is unique. It is the reason why we constantly work to optimize our offer, in order to integrate both your needs and our services.
Our operational supervision structure has the mission to evaluate the job done objectively and continuously, in order to bring the necessary modifications or the appropriate training.

SUMMUMSECURITY VALUES are:

- client orientation
- honesty
- professionalism
